STEMACTIVE BENEFITS

Natural botanical stem cell support*

English · *Versión en español disponible*

StemActive is a natural, plant-based supplement available as capsules and as a gel. It contains botanical ingredients that have been studied for their role in supporting the body's natural release of its own circulating stem cells.* StemActive is designed to support the body's natural renewal, energy and overall well-being.*

StemActive does not contain stem cells. It contains botanical ingredients that support the natural release of your own stem cells.*

What some people report with consistent use*

Individual results vary, and changes happen gradually.

Months 1–2:

- may notice more stamina*
- may notice better recovery after exercise*
- may notice more energy and a brighter mood*
- may notice a greater overall sense of well-being*
- may notice healthier-looking skin*

Months 2–3:

- may notice more physical endurance*
- may notice more flexibility*
- may notice more restful sleep*
- may notice better focus and concentration*

Ingredient research

Two of StemActive's ingredients, Madagascar *Aloe macroclada* and Tibetan sea buckthorn extract, have been the subject of small published studies in healthy adults on the natural, temporary release of stem cells into the bloodstream.* These studies are about the ingredients, not the finished product.

Ingredients (capsules): Proprietary blend 760 mg per serving (2 capsules): Tibetan sea buckthorn extract (fruit, 10:1), AFA Klamath blue-green algae (*Aphanizomenon flos-aquae*, whole cell) powder, Madagascar *Aloe macroclada* powder, L-theanine, goji berry extract (fruit, 4:1), black rice extract, coffee bean extract. 60 capsules, 30 servings per container. For StemActive Gel, see the product label.

Ingredient research (studies on individual ingredients, not on the finished product): Drapeau C, Benson KF, James J, Jensen GS. *Aloe macroclada* from Madagascar triggers transient bone marrow stem cell mobilization. J Stem Cell Res Ther 2015;5:287. · Drapeau C, Benson KF, James J, Jensen GS. Rapid and selective mobilization of specific stem cell types after consumption of a polyphenol-rich extract from sea buckthorn berries (*Hippophae*) in healthy human subjects. Clin Interv Aging 2019;14.
